

QUICKBOOKS INTEGRATION

At Exact, we're committed to supporting the business success of every JobBOSS customer. To help you work smarter, not harder, we've seamlessly integrated the shop floor management expertise of JobBOSS with Intuit's QuickBooks.

Integrated Solution Delivers Immediate Value

Automatically transfer manufacturing data to the accounting side and back. Single data entry into the system minimizes errors and boosts accounting reliability.

Increase Employee Productivity

Time is your most valuable resource. Enter data once with the integrated JobBOSS and QuickBooks solution, giving you a higher level of confidence in your data. Automate manual processes like order entry, job scheduling, material management, invoicing, cash collection, and financial consolidation. Best of all, you and your employees have more time to focus on your customers and the growth of your business.

Accurate Accounting Supports Confident Decisions

The integrity of your data is at risk each time manual entries are made due to additional opportunities to introduce errors. With JobBOSS and QuickBooks integration, data is entered once and shared between applications so you can invest in new equipment, staffing additions and innovations with confidence. Gain comprehensive insight into profit and loss down to the job level. Plan for changes in production and sales by analyzing historical data to anticipate "slow" periods, allowing you to adjust staffing, sales efforts, and customer incentives to keep your shop running strong for the long haul.

Realize Benefits Faster

JobBOSS integration with QuickBooks allows you to get the benefits of job control and shop management software without having to perform an accounting package migration to get started. You need clear visibility into your finances to stay nimble in a competitive business. With the JobBOSS integration to QuickBooks, you bridge the information gap between the constantly changing data in production and critical financial data.
